

WELCOME TO THE PEACHTREE FAMILY:

Sentricon® Termite Baiting System

Why do I need termite protection?

- Subterranean termites can cause major damage to your home.
- These types of termites emerge from the ground and feed on the wood that supports your home!
- Termite damage is not covered by homeowner's insurance.

How does it work?

- PeachTree Sentricon System is the next generation in termite baiting providing superior technology and performance.
- The Sentricon System is designed to help termites find the station quickly – leading to faster discovery, faster consumption and faster colony elimination.
- As the termites feed in these stations and bring the “food” back to the colony, they are also passing along the active ingredient which results in the elimination of the colony and prevention of further damage.
- Peachtree inspects and monitors the stations annually but the stations are always actively working.

Built-In Pest Control System

What is it?

- Revolutionary system that can ONLY be installed during new construction.
- Pre-wired system comprised of very small polyethylene tubes running through the walls. Each tube is specially crafted with precision laser drilled perforations.
- This network of tubes runs just above the baseboards but is hidden inside the walls.

How is it serviced?

- To service this network of tubes, we access the service receptacle located on the outside of your home
- With specialized equipment we are able to provide a safe and effective pest control service by treating inside the wall voids!
- Ants, Cockroaches, Scorpions, Centipedes – you name it, no longer have a safe place to hide.
- With our “Contactless System” you do not need to be home for the routine service as everything is performed from the outside.
- If you experience household pest problems covered under your plan between services, simply contact our office to schedule an extra service at no additional charge.
